

MULTIPIPE Screed-Clip System

Features;

- Clips/Staples available in 40mm or 60mm clips to staple the pipe direct to the insulation board.
- As part of our quotation package we will allow for a perimeter strip which stops thermal bridging from the walls, also taking up a majority of the expansion of the floor.
- Polythene membrane (500 gauge), this stops the screed seeping through to the insulation board causing them to float upward.

Benefits;

- The most cost competitive screed system available
- Allows for easy avoidance of objects on underfloor heating line i.e. pillars, floor sockets etc.
- High thermal mass classification, this is the most efficient of underfloor systems running at only 45oC normally or with closer centres as low as 35oC-40oC.
- The screed stores the energy so once heated this will radiate for hours.
- The **MULTIPIPE** Screed-Clip® system allows the fitting of a highly efficient and cost effective screed system.
- The Screed-Clip® system enables a possible output of 100w/m² on boilers and 70-80w/m² on heat pumps in a retro-fit installation.
- Screed-Clip® enables the designer/installer to vary the pipe centres as required. Pipe can be installed at 200mm, 150mm or 100mm centres.

MULTIPIPE Screed-Clip System

PLEASE NOTE:

For best efficiency, there should be a minimum of 70mm of insulation below the installed screed. If this is not possible, please contact our technical department to discuss alternative options.

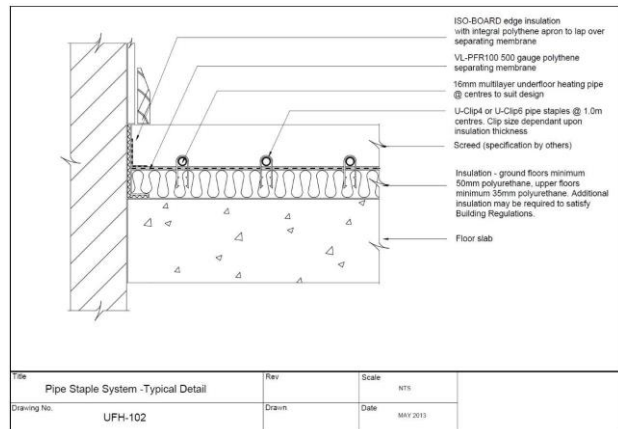

Laying instructions.

- Clean and level floor required.
- Install edge insulation.
- Lay specified insulation layer, supplied by others.
- Lay polythene barrier sheet.
- Lay pipe, using the Screed-Clip® to secure the pipe to the insulation.
- Follow design drawings provided by Multipipe, ensuring the correct pipe centres are adhered to and that no loop exceeds 75m (12mm), 120m (16mm), 150m (20mm)
- Cover with screed as per instructions from screed provider.
- Consult your screed provider about curing times.

We're here to help.....

NOTE;

All Multipipe underfloor heating systems are provided with full installation instructions and, where agreed, a full system design drawing. If you require any further information during your specification or installation, please do not hesitate to contact us on 01245 227630 .

MULTIPIPE

Multipipe has a complete range of screed, joist and overlay systems, please visit www.multipipe.co.uk for details or call 01245 227 630 for details of your local sales manager.
