

MULTIPIPE Float UFH[®] System

Features;

- Insulation that is pre-grooved to either 200mm centres or 150mm centres.
- Available in board sizes from 25mm to 110mm.
- Available foiled or non-foiled (with plates)

Benefits;

- Quick installation times as each board is 1.2x1.2, and foiled boards can be easily cut with a knife.
- Foiled boards do not need filing of the plate edges.
- Because there is no screed, commissioning can be done straight after the floor is down.
- Meaning a full under heating system can be installed, pressure tested, commissioned and ran up in one visit.
- No reaction times so can come on with conventional system.
- 150mm centres is great for heat pumps.

- The **MULTIPIPE** Float UFH[®] system for easier fitting of a highly efficient and cost effective retro-fit heating requirements.
- Available in EPS or XPS at 5mm increments from 20mm to 150mm (Site specific thicknesses may have a 7 day lead time).
- Float UFH[®] enables the designer/installer to vary the pipe centres as required. Pipe can be installed at 200mm, 150mm or 100mm centres.

MULTIPIPE

Float UFH® System

PLEASE NOTE:

For best efficiency, there should be a minimum of 70mm of insulation below the installed screed. If this is not possible, please contact our technical department to discuss alternative options.

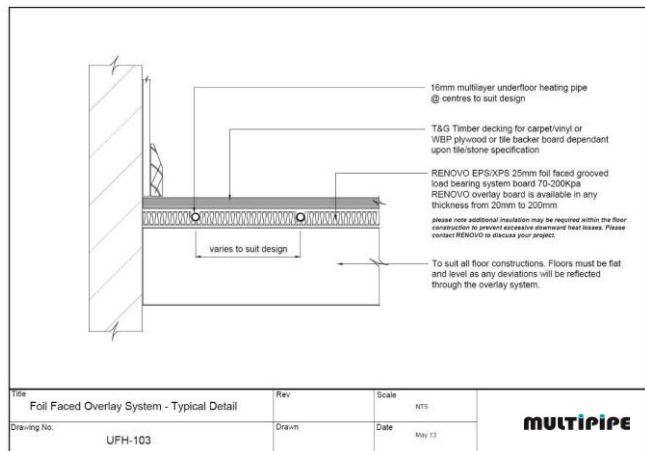

Laying instructions.

- Clean and level floor required.
- Lay specified routed insulation layer following installation design Drawing.
- Lay pipe, within pre-routed grooves, using a craft knife to split the foil cover on return bends where required.
- Follow design drawings provided by Multipipe, ensuring the correct pipe centres are adhered to and that no loop exceeds 120m (16mm)
- Cover with 18 or 22mm T&G Chip Board or Ply Board as specified ensuring that fixing do not pierce the underfloor heating pipe at any point.
- When installing floor finish, please ensure the appropriate adhesives are used. Consult manufacturer or installer about his.

We're here to help.....

NOTE;

All Multipipe underfloor heating systems are provide with full installation instructions and, were agreed, a full system design drawing. If you require any further information during your specification or installation, please do not hesitate to contact us on 01245 227630 .

Multipipe has complete range of screed, joist and overlay systems. Please visit www.multipipe.co.uk for details or call 01245 227 630 for details of your local sales manager.
