

- System approvals from more than 150 providers for use in the plumbing, heating and air conditioning sector for various industrial custom applications
- Additional functionality tests with selected pressing profiles by the German Material Test Institute (MPA)
- Long service life through optimised manufacturing processes combined with a high degree of dimensional accuracy and resistance to wear
- Constant processing results thanks to consistently high manufacturing quality
- Klauke expertise and many years of experience ensure additional benefits and higher levels of reliability
- Support for system development under a partnership with Klauke

The applications based on dimensions, profile and machine type are set out in the Application and Assembly Instructions from the system supplier.
