## Multipipe Quantum Digital Thermostat

### Technical Data Sheet

#### Product Detail

The Quantum thermostat is the latest innovative addition to the Multipipe portfolio. This sleek and stylish thermostat is one of the thinnest on the market at only 10mm thick\*. Powered by 230V, the SQ610 is a genuinely unique thermostat, allowing a choice of hard-wired connectivity or RF communication via 2.4 GHz if only two wires are fitted, giving you an easy connection to your SMART Home system. Control either locally or from anywhere via Smartphone, Tablet or PC. With innovation, science and quality in one, the new Quantum SQ610 thermostat is feature-packed to ensure that your clients have perfect control over their heating system.

#### Benefits

- Easy to programme and use control
- Rechargeable Li-ion Battery
- 5-year warranty
- Larger easy to read back-lit screen
- Ultra-slim design (10mm thick)\*

#### Features

- ITLC (Internal Temperature Load Compensation)
- Smartphone integration
- ErP Rating IV
- ZigBee Wireless protocol
- Heating and cooling compatible
- Built-in humidity sensor

Underfloor Heating

Product Code	22-23006
Input Voltage	230v
Communication	ZigBee /230v
Temperature Setback	Adjustable
Temperature Span	+/- 0.1°C (Default 0.5)
IP Rating	IP 30
CE Conformity	Class II (EN60730)
Dimensions (LWD)	86 x 86 x 27mm

\* minimum 25mm backbox will be required

#### Supplementary Products
