

MULTIPIPE QUANTUM DIGITAL THERMOSTAT

22-23006

PRODUCT DETAIL

The Quantum thermostat is the latest innovative addition to the Multipipe portfolio. This sleek, stylish thermostat is one of the thinnest on the market, at only 10mm thick*.

Powered by 230V, the SQ610 is a genuinely unique thermostat, allowing a choice of hard-wired connectivity or RF communication via 2.4 GHz if only two wires are fitted, giving you an easy connection to your controller and smart home system.

Control either locally or from anywhere via Smartphone, Tablet or PC. With innovation, science and quality in one, the new Quantum SQ610 thermostat is feature-packed to ensure that your clients have perfect control over their heating system.

* Minimum 25 mm backbox will be required
