

ALTIS NUB UNDERFLOOR HEATING SYSTEM

PRODUCT DETAIL

The Altis Nub Panel Underfloor Heating System is a lightweight, durable polystyrene plastic panel designed for fast, secure installation of 15–20 mm underfloor heating pipe. Its integrated nubbed surface securely holds the pipe in position while maintaining consistent pipe spacing, eliminating the need for adhesive, staples, or separate mechanical fixings.

Featuring an easy-to-use interlocking edge design, the panels connect to form a continuous and stable installation surface and can be cut to suit individual room layouts.

PIPE TRAYS

PRODUCT CODE	10-16220
PRODUCT CODE 60MM	1.450m x 0.850m x 23mm
COVERAGE PER PANEL	1.12m ²
SUITABLE PIPE DIA.	15-20mm
MATERIAL	Polypropylene
ADHESIVE	NO
INTERLOCKING	YES
NUB SPACING	50mm

FEATURES & BENEFITS

- Suitable for a wide range of standard underfloor heating pipe sizes.
- Panels connect securely together to create a stable, continuous installation surface without the need for adhesive.
- Integrated nubs hold the heating pipe firmly in position, helping maintain consistent pipe spacing and circuit layout.
- Easy to handle, transport and cut on site, helping to reduce labour time.
- Suitable for systems with would otherwise require time consuming fitting to the floor i.e. concrete floors.
